

EEMC are an independent practice of Environmental Monitoring and Consultancy experts focusing on the construction, demolition and civil engineering sectors.

From our London offices we deliver the complete package of specialist environmental services in Acoustics, Noise, Vibration and Air Quality. Our services include: Remote & Attended Monitoring; Technical Reporting; Section 61 Consents; Air Quality Management Plans; Construction & Site Environmental Management plans; Acoustic Modelling; and all associated technical and consultancy services.

We have in excess of 30 years' experience working with, and providing expert advice to, contractors and local authorities and are members of the appropriate professional bodies, including the Institute of Acoustics. Our ambition is to provide a straightforward yet comprehensive service with a focus on client satisfaction.

### Key Services:

#### **Monitoring**

Using the latest specialist monitoring instrumentation and technology, our monitoring services provide real time data and alerts when trigger levels are exceeded. Advanced calculation methodologies allow for proactive monitoring and optimised reporting of all parameters allowing clients to minimize risk.

#### **Consultancy**

Our consultants are recognised experts in the field of Noise, Vibration and Air Quality management. We have extensive experience in the preparation and negotiation of Section 61 consents and Air Quality Management Plans, providing advice to contractors and local authorities.
